Ref. to 1A & Meeting

July 1958

MEMORANDUM FOR: Director of Central Intelligence

SUBJECT:

Report on Inspection Problems  
Involved in Possible US-Soviet  
Agreement Banning Production  
and Deployment of Long-Range  
Ballistic Missiles

REFERENCES:

- (a) IAC-D-119, 26 May 1958, 3.  
(b) IAC-D-119(1), 3 July 1958, 1S 1417/3.

1. The subject report is on the agenda for the IAC meeting of 8 July for voting. The report has been produced with the help of a number of Department of Defense officers and representatives of missile contractors. However, it is considered to be a CIA reply to the Department of State request and is not intended to be an agreed or coordinated intelligence paper.

2. The problem addressed was the feasibility of developing an inspection system designed to disclose any significant Soviet violation of a possible US-Soviet P agreement to ban the production and deployment of long range ballistic missiles.

SECRET

Approved For Release 2000/08/23 : CIA-RDP62S00545A000100020122-9

SUBJECT: Report on Inspection Procedure Required in Possible  
USA-USSR Agreement Banning Production and De-  
ployment of Long-Range Ballistic Missiles

3. The report concludes that such an inspection system  
can be designed, with a reliability of 75% to 90%. The elements  
of this system, 14 in number, are contained in para 2c, pages 1  
and 2 of the report.

4. The report has been revised to incorporate the comments  
of all Department of Defense technical experts who participated in  
the symposium. No comments have been received from individual  
members of the IAC, except for Brigadier General R. A. Breitwieser,  
Deputy Director for Intelligence, The Joint Staff. He is concerned  
that an IAC "noting" action may be interpreted as implying con-  
currence in the report and full approval of its findings.
